Experience

Software Developer

Dec 2025 – Present

1nd AI

Remote

- Engineered an automated order-validation system improving fulfillment accuracy and reducing manual review overhead.
- Designed structured data pipelines to detect incomplete, inconsistent, or high-risk transactions.
- Implemented scheduled background workflows to ensure autonomous validation and reporting.
- Built PDF discrepancy reporting tools using Python (ReportLab, PyPDF) for audit and operational visibility.
- Worked directly with stakeholders to translate business requirements into maintainable backend systems.

Surveillance Analyst

Apr 2024 – Present

Grey Eagle Casino

Calgary, AB

- Monitored live operations in a highly regulated gaming environment with zero tolerance for error.
- Identified irregular activity patterns and produced structured documentation for investigations.
- Applied compliance and risk protocols requiring sustained attention to detail and discretion.
- Maintained audit-ready reporting aligned with regulatory standards.

Operations and Sales Intern

Apr 2022 – Sep 2022

Broil King

Calgary, AB

- Coordinated logistics operations across 17+ warehouse and retail distribution locations.
- Built a route-optimization script to determine the fastest path across all warehouse stops.
- Tracked inventory movement and maintained structured reporting workflows.
- Improved cross-functional communication between sales, operations, and distribution teams.

Projects

Card Counting Detection System

- Developing a computer-vision based card tracking and behavior analysis system using Python and OpenCV.
- Built detection logic for identifying advantage-play patterns from structured video data.
- Focused on real-time monitoring, edge-case handling, and statistical pattern recognition.

Fraud Detection & Monitoring System

- Built a rule-based fraud detection workflow for flagging anomalous transactions in real time.
- Designed alerting logic with backend validation pipelines and structured logging.
- Prioritized explainable detection logic over black-box approaches.

Stock Market Monitoring System

- Developed a Python-based system integrating financial APIs for real-time stock tracking and alerts.
- Implemented automated statistical outputs with modular, extensible API integration.

Reserv – Booking Platform

- Built a full-stack booking system using HTML, CSS, Python, Node.js, and Firebase.
- Implemented authentication and structured database management.

Technical Skills

Programming:	Python (primary), JavaScript, TypeScript, SQL, C/C++
Backend:	Node.js, Express, Django, Flask, REST APIs, Automation Workflows
Frontend:	React, Next.js, Tailwind CSS
Database:	PostgreSQL, Microsoft SQL Server, Oracle SQL
Data:	Pandas, NumPy, Data Validation Pipelines, Pattern Recognition
Tools:	Git, Docker, AWS, Azure ML, Firebase, CI/CD

Education

Wilfrid Laurier University

Waterloo, Ontario

Bachelor of Science in Computer Science

May 2023

- Vice President of Events – Laurier Fintech Association
- Vice President of Operations – Laurier Latin Society
